

CAR RENTAL VARIETIES & RATES

Dear AAA Partners,

We lease cars that are not only reliable but also look great. It is an issue of pride and reputation with us! Cars do get banged up sometimes, but we have the cars fixed and painted as soon as we have access to them. Our fleet looks and runs great! If any vehicle breaks down or has a flat tyre or even needs a cleaning and wash, just call us 24/7.

4x4

Models and rates vary!
\$ 520 - 900/month
Rs. 3500 - 5500/day

We are cheaper than the rest because all of our cars are purchased when the requirement arises. Our cars are constantly rented and hence we don't have to factor in the rates for the days and months that the cars are NOT rented into the monthly rent. Because of these factors (cost efficiency, eye for service, care for customers, etc) AAA has expanded 300% in the past 3 years and currently has excess of 50 long term clients (90% expats), making us perhaps the largest car rental agency of its type in Islamabad.

We do try to be flexible on the rental terms which are specified in the rental agreement. We realize the specific issues related to security and mission orders related to lock-down, unplanned early departures, etc, and have always been very accommodating on these issues.

Thank you for your interest and we look forward to serving you.

** Daily rates will be applicable on all lease agreements of 45-Days or less.
